Naval Air Station, Alameda
Facilities Management Office - Code 52
Building 114
Alameda, California 94501-5000

Dear Ms. Withrow:

FACT SHEET #4, INSTALLATION RESTORATION PROGRAM UPDATE, MARCH 1993, U.S. NAVAL AIR STATION, ALAMEDA

The Department of Toxic Substances Control (DTSC) has reviewed the Fact Sheet #4: Installation Restoration Program Update and would like to provide the following comments.

1. Page 1, Background: Highlighting the four categories with title will make the categories stand out and be more clear. For example 1) LANDFILLS, 2) INDUSTRIAL SITES AND TRAINING AREAS, 3) SEAPLANE LAGOON AND ESTUARY, 4) STATION STORM DRAIN SYSTEM.
2. Page 2, Buildings and Training Grounds: Maybe this heading should be changed to Industrial Sites and Training Areas. The word "grounds" may confuse people.
3. Page 3, Future Activities: The Investigations at the Seaplane Lagoon and along the Estuary (Eco Assessment) has begun. The JP-5 Fuel Spill removal is nearing completion.
4. Page 4, What's Been Done to Date (continued), Water Areas: The Eco Assessment is underway right now.
5. Page 6, Where To Get More Information: There should be an invitation for people to get on the mailing list. Maybe include a coupon for people to send in to be put on the mailing list.
6. General Comment, Public Meetings: To your credit you should say that public meeting have been held in the past for the Installation Restoration Program and that meetings will be held in the future at certain junctures in the IR Program.

Ms. Sherry Withrow
